TURBINE FLOW METERS

- Simple & Reliable flow metering for clean liquids & gases compatible with stainless steel.
- Display volumetric or mass flow.
- Sizes from 4 to 200mm NB.
- Accuracy $\pm 0.5\%$
- Operating velocity range 0.3 to 6 metres/second.
- Loop powered integral display.
- 4-20mA output of flow rate for simple PLC connectivity.
- Resettable totaliser in local display.
- BSP female threads for easy installation. For sizes up to DN40. Sizes DN50 & over are flanged as required.
- Optional PVC union connectors for radial removal from plastic piping systems.

Pair this flowmeter with other Merriman Instruments to build powerful local control & instrumentation systems

MERRIMAN DIR4 LARGE DIGIT INDICATOR

- 4 Programmable set points.
- Outputs via VFC relays.
- Mains powered with on board 24VDC sensor power supply.
- 4.5 digit LED display, range in engineering units
